

Luxury Apartments by Amadeus, Italy.

L This Italian luxury apartment was automated by Leviton Security & Automation Distributor, Amadeus Network Solution SRL.

Installation of a complete automation system required the management and control of lighting along with switched power sockets for temperature control and air conditioning. A multisource/multizone audio system was of high priority and Leviton Security and Automation's product range suited the installation's demands precisely.

Additionally, security and video surveillance was included. Because the residence is a holiday home, remote management was essential and Leviton's mobile device apps work seamlessly with all systems.

This condo utilizes Leviton Security & Automation's Omni Pro II controller, OmniTouch 5.7e Touchscreen, Hi-Fi 2 Distributed Audio System, Home Theater Extender 2, Omni Console, Two-Way Voice Module, Leviton Dock, Cellular Communication Center, Access Control products, Camera Server, Snap-Link Mobile for iPhone, Snap-Link for PC.
